

ENGLAND'S DRAFT OF REPARATIONS NOTE IS MAILED

Note Dispatched To Italy,
France, Belgium, Japan
And United States.

OFFICIAL CIRCLES
OPTIMISTIC TODAY

Root And House Suggested
For Chairmanship Of
The Commission.

London, July 21.—The next step in
the reparations muddle was again
France's today.

England's draft of the note to Ger-
many, dispatched yesterday to the
allied governments—France, Belgium,
Italy, Japan and the United States—
awaits their reply but only the reply
of France is causing any apprehen-
sion.

The contents of the note and its ac-
companying memorandum have been
guarded with official silence, and the
nations receiving it also have been
requested to reveal nothing of its con-
tents.

It is semi-officially stated that the
draft follows the plan outlined in
Premier Stanley Baldwin's recent
speech in the house of commons.
There have been no other official or
semi-official disclosures.

The Daily Express this morning
says it understands, however, that the
memorandum points out that England
cannot demand that Germany end, pas-
sive resistance because the govern-
ment believes the Ruhr occupation is
illegal. The suggestion is made, the
Express says, that the question of the
legality of the occupation be submitted
to The Hague tribunal.

"The Spectator" declares the govern-
ment is desirous that the United
States participate in the settlement
and is anxious for an American to
head the proposed commission to in-
quire into Germany's capacity to pay.

Suggest Root and House

The names of Elihu Root and E. M.
House are suggested for the chairman-
ship of the commission.

The United States received only a
copy of the draft note and did not
get the accompanying memorandum
or covering letter, it was learned at
the foreign office.

Official circles were optimistic to-
day over the latest developments in
the situation.

Washington, July 21.—In the course
of the negotiations and diplomatic ex-
changes that are due to take place be-
tween London, Paris and Berlin dur-
ing the next few months in effecting
an adjustment of the reparations
problem, Premier Poincare will be
personally advised of the position of
this government by Jules Jusserand,
the French ambassador to the United
States, it was learned here today.

Jusserand will close the embassy
here on Tuesday and will sail from
New York for France the following
day. Immediately upon his arrival, he
will proceed to Paris for conferences
with officials of the French foreign
office and will acquaint them through
personal conversations with the feel-
ing in this country toward the occu-
pation of the Ruhr.

ROCHESTER PLANS THIRD HOMECOMING

Expect Three Thousand To
Attend Festivities On
Saturday, Aug. 11.

If you can picture 3,000 or more
friendly people shaking hands, patting
each other on the back, eating big
basket dinners, enjoying sports, listen-
ing to excellent vocal and instrumen-
tal music and to an inspiring address
by a prominent speaker of state wide
reputation, then you can imagine the
good things in store for those who at-
tend the third annual homecoming at
East Rochester, on the western edge
of Columbiana county, Saturday, Aug.
11.

A committee of citizens is hard at
work completing elaborate arrange-
ments to have this event surpass all
previous homecomings held at this

all former residents.

Day and evening programs have
been arranged for and all are re-
quested to come during the morning and
stay until the close of the evening
program.

George Robinson, the Mounts Bros.
and many other residents of Salem
are former residents of the vicinity of
East Rochester. James McDonald, is
president of the association and Mrs.
Ralph Emmons is secretary.

Judge Hugo Pann. In sentencing
Lorenz, "it assures this country

ten an editorial calling members of
the legion tramps, vagabonds and
thieves.

CHILDREN OF CITY FROLIC AT GLENS

Ice Cream Is Passed Five
Times At Salvation
Army Outing.

The Salvation Army was the host to
over 150 children and their parents at
the most successful picnic the Army
has ever given, at Eagleton glens Fri-
day.

It was a day crammed full of games,
eats, more games, races of all kinds
and boating. The program which
started at 9:30, enjoyed by old as
well as young, was in charge of Envoy
and Mrs. Ward.

Envoy Ward said that he had never
seen as tired or as happy a bunch be-
fore. Five different times, Mr. Ward
said, they passed out ice cream and
peanuts but the youngsters still called
for more. Watermelon, brought up as
a final resort to fill the young hungry
stomachs, touched the spot and cries
for food ceased.

After the big dinner at noon the
program of games and races was
started. The women's race was won by
Mrs. Frank Hemphill, second Miss
Fred Coy; men's race, William Hart;
sack race, Nick Clemen; girls' sack
race, Wilma Coy; backward race,
Leonard Wynn; fat girl's race, Mamie
Ward; second, Audrey Hoffman,
children's race, Ruth Ingram first;
Violet Bodo, second.

Boys played volleyball and baseball
and enjoyed boating after the races.
A lunch was served before the merry
party started home at 5:30 in the 15
cars donated by Salem business men.

The transportation was in charge of
C. W. Zimmerman. Envoy Ward said
that he wants to thank Mr. Zim-
merman, Salem business men and all
others who helped make the picnic a
great success.

BOYS BUILD DAM AT SCOUT CAMP

A score of Salem Boy Scouts left
at 1 p. m. Saturday for the Pottery
scout reservation near the Bunker
Hill church where they will spend
the afternoon constructing a dam
under the supervision of Commissioner
Lee R. Chamberlain.

After the evening meal the scouts
will hike to the old Pottery but where
a wall scaling contest will bring the
city meet of 1923 to a close.

Throughout the meet the nip and
tug rivalry between the county
champions of Troop 1 and the run-
ners-up of Troop 7 has been exciting.
Troop 7 has a five point lead and
must take second place in the wall
scaling this evening to win the city
championship.

Train Derailed, 100 Passengers Shaken

Denver, Colo., July 21.—A hundred
passengers were only slightly shaken,
but three railroad employees were in-
jured near here early today when a
United Pacific passenger train enroute
from Chicago to Denver left the rails.
Five coaches were derailed. The in-
jured were brought to Denver.

Railway officials said they could not
explain the wreck, but stated the train
20 minutes late, was running 50 miles
an hour.

ward J. Conroy, considered one of the
most important witnesses for the state
in the trial of John L. Whitfield for
the murder of Patrolman Dennis Grif-
fin, which opens Monday, is in a hospi-
tal today suffering from serious in-

WOMEN DEMAND EQUAL RIGHTS IN GOVERNMENT JOBS

Workers Council Chairman
Outlines Demands At
Party Convention.

DENIED CERTAIN
POSITIONS, CLAIM

Men, Holding Appointive
Powers, Do Not Pro-
mote Women.

Seneca Falls, N. Y., July 21.—Wom-
en holding government positions no
longer believe men have vested rights
in the higher places in the government
service, declared Miss Laura Berrien,
chairman of the government workers' con-
council, at the business session to-
day of the National Women's Party
convention.

"This is evidenced," said Miss Ber-
rien, "by the response of women in
all ranks of the service to a call for
the organization of the government
workers council of the National Wom-
an's party and by the adoption of a
platform demanding:

"1.—That all examinations in the
civil service shall be open to women
on equal terms with men, that a sin-
gle register shall be kept of men and
women from which appointments are
made in the order of rating regard-
less of sex, and that no new register
shall be opened until the previous
register is exhausted.

"2.—That women shall no longer be
excluded from executive, administra-
tive and high salaried positions and
that there shall be no discrimination
against women in appointment, assign-
ment, title, promotions or salary.

"3.—That there shall be a special
board or committee in every subdivi-
sion of each department and independ-
ent organization, on which women
have equal representation with men
to fix salaries and to pass on all re-
organizations, investigations, appoint-
ments, assignments, ratings, promo-
tions, demotions, transfers and dis-
missals.

"4.—That there shall be no discrimi-
nations against women because of
marriage.

"Women are denied certain govern-
ment positions because the right lies
with a man to designate the sex of
the person required," the speaker said.
"The women are unfairly denied
these positions because the appoint-
ing officer can, under present condi-
tions, designate sex in calling for
the appointees.

"However, a greater injustice exists
in the service. Most of the higher
places are filled by promoting per-
sons in the ranks who have worked
their way up. Persons originally ap-
pointed as clerks, stenographers and
the like.

"Women receive their just share of
appointments to the lower grades but
they suffer the greatest injustice that
is to be met with in that, having pass-
ed the same tests as men, they are not
permitted to take higher places by
promotion."

PAYROLLS REACH RECORD TOTALS

Large Gains In Number Of
Workmen Employed Are
Reported To Board.

Washington, July 21.—Payrolls of
factories in the United States have
reached record totals, the federal re-
serve board said today.

Large gains in the number of work-
men employed reported in 20 leading
industries, including tobacco, petro-
leum refining, steel, saw mills and
types of building materials.

Heaviest increases in payrolls, the
board said, occurred in textile indus-
tries, iron and steel industry, in car
building and automobile manufacturing.
Increases in size of the pay checks in
the steel industry is due largely to re-
cent advances in wages granted by
the steel mills.

Substantial increases in employ-
ment are reported in tanneries, sugar
refineries and car repairing plants.
Decreases that were largely seasonal
in character were reported in the
clothing and food industries.

REPORT PANAMA CANAL LANDSLIDE

Los Angeles, July 21.—Reports re-
ceived here last night that a serious
landslide had taken place in the Pan-
ama canal were being investigated
today by shipping men.

The report was wireless to sev-
eral ship owning concerns by masters
of oil tankers in the vicinity of the
canal. The ships' masters did not
report the canal as being blocked,
but sought instructions, as to what
action to take in the event of such
an occurrence.

VILLA SHOT DOWN, REVENGE IS MOTIVE

Mexico's Picturesque Bandit
Leader And Bodyguard
Are Slain.

Mexico City, July 21.—Pancho Villa,
Mexico's picturesque bandit leader,
was shot down by men who had sworn
to take his life to revenge the execu-
tion of the father and three brothers
of Francisco Herrera, a political
leader opposed to the bandit chief-
tain, according to the belief of govern-
ment officials here today.

Herrera's relatives were executed
at the order of Villa when he was in
the heyday of his power. Herrera
swore he would one day wreak his
vengeance upon Villa. Time and
again, it has been known, attempts
have been made to assassinate Villa.
Several times he is reported to have
shot down men of his following whom
he thought planned an attempt on his
life.

It has been definitely learned that
in addition to Villa, his secretary, Col.
Miguel Trillo, and three members of
his bodyguard were shot down by the
assassins.

Villa went to Parral a few days
ago to arrange for the sale of his
crops. He started back to Canutillo
early yesterday morning in an auto-
mobile, which he was driving himself,
he had refused to make the trip by
horseback.

Just as he was leaving the town,
passing through a suburb called Guan-
ajuato, seven men hiding behind a
fence surrounding an abandoned
house, opened fire. Villa and two of
his men were instantly killed, the
others being shot down a few minutes
later.

Word of the killings was immedi-
ately sent to President Obregon, who
ordered a full investigation made at
once.

An interesting program was the
feature of a meeting of Goshen grange

remarks by Master A. E. Bailey of
Mile Branch grange; recitation, Ruth
Borton; vocal solo, Mrs. Clifford
Israel; reading, Maynard Fallow;

and plans were made for the annual
grange fair to be held at the hall
Sept. 19.

ments are: Supper, Mrs. Emma Min-
ner and Mrs. Eva Carr; fancywork and
market, Mrs. Homer Gray and Mrs.
J. H. Conway; candy booths, Misses
Lucille and Olive Stratton; decorating,

Kampfer; cashier of the fair, Mrs.

old Roberta Bledgett showed
continued slight improvement
today in the 24th day she has

ARTISTS RECITAL IS REAL DELIGHT

Students Of Boston Music
Conservatory Heard At
Local Church.

One of the most pleasing vocal and
instrumental concerts ever presented
in Salem was that given by the
Coy sisters and Miss Madeline Meredith,
of the New England Conservatory of
Music at Boston, in the First Chris-
tian church Friday night, under the
auspices of the Local Women's club
of that church. The proceeds from
the concert will go to the Local Wom-
en's church purchase fund.

A splendid grand piano was install-
ed through the kindness of R. A. Li-
mont, Jr., for the occasion and the
meeting was beautifully decorated
with palms and ferns, the program
being given in the church auditorium.
Able critics pronounced the enter-
tainment one of the finest ever pre-
sented in the city. Miss Ione Coy, vi-
olinist, was excellent as were her sis-
ter, Miss Marian Coy, coloratura so-
prano, and Miss Meredith, pianist.

Two exceptionally fine numbers
were selections from manuscript play-
ed on the piano and violin and com-
posed by Prof. Keller. Miss Coy's vi-
olin instructor. The themes rendered
on piano and violin were a variation
to those appreciative of high class
music. The artists proved themselves
a credit to the musical institution at
Boston.

All three of the young women will
remain in Salem over the week end
and on Sunday morning will again ap-
pear in the Christian church giving
special numbers at both the Sunday
school assembly and at the commu-
nion service.

CROSS IS BURNED NEAR LEETONIA

Some excitement was created in
Leetonia between 10 and 11 p. m.
Friday when its residents observed a
blaze of light, just south of town in a
field on the John Floding farm, which
at first was thought to be a fire.

Hundreds of people went to the field
and they found the blaze to be from
a fiery cross, the emblem of the Ku
Klux Klan organization, although
there was not a person in sight.

This is the second cross to be burn-
ed this week, the other one having
been in the northern part of the town
on East High st.

Raymond McDevitt Sustains Fractured Skull, Both Legs Are Broken.

DRAGGED 40 FEET
BY CAREENING CAR

Witness Says Auto Was On
Wrong Side Of Street;
Fails To Stop.

Raymond McDevitt, 22, Lisbon, is
in the Salem City hospital in a dying
condition with a fractured skull, both
legs broken and his body a mass of
cuts and bruises as the result of being
struck by a speeding car at the cor-
ner of Washington and Beaver sts. in
Lisbon at 1:30 a. m. Saturday.

McDevitt was returning to his
home after a trip to Toledo. He had
driven a car home from the factory
at Toledo for S. L. Noid, Lisbon
dealer, and went to a restaurant near
the scene of the tragedy to eat before
going home.

As he left the restaurant and start-
ed across the street a car coming at a
terrific rate of speed struck the young
man and dragged him 40 feet. The
driver of the car did not stop but
accelerated south.

John Guy, who lives near the scene
of the accident, said that at about
1:30 he was awakened from sleep by
the clatter and crash of street cross-
ing plates and heard a terrified yell.

Hastily dressing Guy ran to the
phone, called Chief of Police Roy
Lukins, and ran out to the street and
found McDevitt, 40 feet from the cor-
ner, moaning, a pitiful sight, near the
curb.

Witness Tells Story
Chief Lukins arrived with a phy-
sician and with the assistance of Guy
placed the injured man in an auto.
They were just ready to take him to
Salem when they heard a woman call
that she could tell about the accident.

Telling her story quickly the wo-
man said that she was sitting up with
her sick child when she heard a car
making a lot of noise coming down
the street. She rushed to the window,
saw them coming down the left side
of the street at a breakneck speed,
swerving from side to side of the
street. As they neared the corner
the car was over near the curb on the
wrong side of the street.

Suddenly she said she saw McDevitt
emerge from the restaurant and start
to cross the street. The car, which
he had no time to dodge, struck him
as he screamed.

Chief Lukins gave orders to a pass-
erby to notify Salem and East Liver-
pool police to be on the lookout for
the car, which was a closed sedan, and
containing the woman thought, at
least two persons.

They brought the injured man to
the Salem City hospital after the phy-
sician, who was dressing the man's
cuts as the chief listened to the wo-
man's story, said he thought the man
had a fighting chance to live.

McDevitt lives at the home of
Archie Peppie, West Water st., Lisbon,
and is a son of Reuben McDevitt, near
that city.

Of Education Along
Peace Lines.

A delegation of Wilbur Friends
from Salem motored to Tuscarora park,
New Philadelphia, Friday to attend
a Friends picnic, arranged by the
young people of the meetings in Sal-
em, Winona, Damascus, New Middle-
ton and Belmont county. About 200
people were interested in the event.

A "peace" program was given. Ar-
thur Gamble, a program who recently
returned from reconstruction work
in Russia, told of the effect of war
on the Russians and suggested as one
solution of the war problem, that of
educating the children along peace
lines, bringing them up without hatred
to those of another nation.

Robert Smith, Barnesville, teacher
in the Friends Boarding school, also
emphasized the need of education to
peace. Other speakers were Dorothy
Winder of Philadelphia and Florence
Hall of Adena.

The Trouble With Wheat

WHILE Senator Brookhart of Iowa is demanding a special session of congress to pass legislation for the relief of the depression dollar wheat has emphasized in agriculture, there comes from the board of governors of the International Farm congress the positive statement that hope of relief through government price fixing is based on a false theory and nothing can come of it. The force of the statement is increased as one studies the names of the men on the board of governors. Each man is a producer or has been, is closely associated with the production on the farm, is a leader and competent to speak with authority.

Rather than pursue the vain hope of legislation for agricultural relief, the men state the cause of their trouble is too much wheat, too much dependence on one crop and the remedy is to change that condition. When the International Farm Congress meets in Kansas City in October there will be a plan submitted for crop diversification through all the producing states to prevent recurrences of the present situation. These men point out that agriculture in the states in the wheat belt has drifted dangerously near a one-crop basis, therefore is out of balance. The time has passed, they insist, when wheat can carry the overhead of a farm, produce a crop that will supply the owner with funds to purchase all other supplies needed and still pay the cost of its production and marketing.

The situation is not hopeless, it is pointed out, there is no need for experiments of any sort, economic, political or legislative, because it has been proven that wheat states are adaptable to abundant crop diversification and livestock production. Better conditions will be developed on the farms, the governors say, when the production program has been made to bring in revenue from some source each week of the year, to be supplemented at harvest time by the wheat revenue. To bring this about there must be poultry, milk herds, livestock of all kinds, the producer having income from a dozen sources rather than one. That is the remedy the congress suggests for the sickness that is apparent in the wheat belt. The problem is national, important to each citizen, and affects all business interests, but more legislation will not bring the desired solution.

Better Postal Service

NOW that the Ohio Postal conference convention delegates and their speakers have emphasized the need of co-operation on the part of the public with the postal workers, postmasters unquestionably feel that much benefit will result.

The business and industrial interests of this city can be relied on to do their part in lightening the burden of the postal workers and in expediting the mails. In common with all other postoffices in cities the size of Salem and larger the increase in business has been large. This is attributed mainly to the phenomenal business revival that has spread throughout the United States. The business expansion has been unprecedented; naturally this is reflected in the volume of business handled by the postoffices throughout the land.

The parcel post business alone is something tremendous. Postmaster General Harry S. New himself says everybody is using the parcel post because it represents the ideal of transportation methods. But the parcel post business has grown to such dimensions that people are now using it for what properly should be handled as freight. This makes the work doubly hard for the postal workers and more difficult for the government to handle it. Still, the government is doing a very good job, and is determined to do a better job.

Co-operation is the big word—co-operation on the part of the postoffice patrons. Full co-operation will come eventually; it is a matter of education, and the postal authorities are going about it in the right way to get it.

LIKE A HOUSE—THE VENTILATION

When they were building a new building at the university the architects kept stressing the point of a "double fan system for ventilation."

You can see what this means to the air of the building. A huge fan to draw all the impure air out, and another huge fan to drive the pure air in.

So many places heretofore had been ventilated simply by the exhaust fan which drew the impure air out.

And so as I thought of that body of yours and of the tremendous need for ventilating all its parts—every organ—every tissue—I realized how wonderful the Creator had fashioned your ventilating system.

As you know, your system of ventilation is by the lungs. If you are an adult in ordinary health you will breathe in and out about 17 or 18 times in the minute.

And what happens when you breathe in? Why Nature sends in about 30 cubic inches of air almost pure, rich in oxygen—the life giving element.

And what is breathed out? Thirty cubic inches of air, rich in carbon dioxide which contains the poisonous products of the system.

Thus Nature since man's creation has been using the double fan system to ventilate that body of yours.

Now I've spoken of the lungs as the ventilating organs and of course they rank the bulk or large exchange from the outside world to you, and from you to the outside world.

But your faithful friend the heart with the assistance of all blood vessels has been really doing the ventilating of the very smallest and remotest part of the body.

You see when blood with fresh air goes to an organ or any tissue it builds up that tissue and organ as it passes through it; likewise it takes away from that organ or tissue their worn out parts.

This blood loaded with the waste matter comes back to the lungs to get rid of said waste, and to take on fresh air for building purposes.

So although that body of yours has the double fan system of ventilation by means of the action of the lungs, the real work of ventilating is done by the blood as it passes through the tissues.

In the styles—The craze for red is growing in favor. The deeper shades are the most fashionable and also combine best with the cream tints in straw which are the fad this year.

Things to Know About Our Service

Electricity and Summer Comfort

HERE'S where we talk appliances for a paragraph or two. They're important in our service to you because they form the medium between the current in the wires and your comfort and convenience.

Ever stop to think that electricity will keep you warm in winter and cool in summer? We wish every customer on our books owned an electric fan—not solely because of consuming the current—fans operate on very little electricity—but because cool, refreshing fan breezes on a blistering hot day would only remind you again of the comforts electricity brings to modern life.

It's mighty fine, too, to eat summer meals prepared right at the table on an electric grill or table stove. The electric iron is another joy-bringer in hot weather and with a portable sewing machine attachable to any light socket, the women folk can sew any place the breeze blows.

How about your own summer comfort? Are you using electrical appliances to lengthen the leisure and enjoyment of the short vacation season?

Camp Meeting Opens At Sebring Grounds For 10-Day Session

Sebring, July 21.—The nineteenth annual camp of the Sebring Camp-meeting association opened Friday night for a ten days' series of services at the Sebring camp ground.

An imposing group of special workers has been assembled for the annual services. This group includes Joseph H. Smith of Redlands, Cal.; Rev. J. L. Brasher, D. D., of University Park, Pa.; T. M. Anderson, Wilmore, Ky., and J. W. Hughes of Wilmore, Ky.

Singing will be in charge of Prof. Kenneth and Miss Eunice Wells of Indianapolis. Miss Virginia Shaffer, who needs no introduction in this district, will be soloist. Jean Kincaid Smith, assisted by several special workers, will be in charge of young people's meeting while Miss Stella McNutt will be in charge of the children.

A group of eight comprises this year's committee on arrangements. Included in the group are George E. Sebring, W. L. Murphy, Ray Y. Cliff and Rev. O. J. Moore of Sebring, W. S. Holloway of Cleveland, Rev. Morris Floyd of Canton, and Rev. John Pennington of Damascus.

Cottages on the beautiful camp grounds were being rapidly filled today. The stately maple grove,

crowning Quaker Hill, is expected to be the mecca for thousands of fervent worshippers this year.

GRADE CROSSING ACCIDENTS MOUNT

Despite all efforts to emphasize the perils of recklessness, grade crossing accidents on the Pennsylvania Railroad system, during June, showed an increase of 60 per cent as compared with the corresponding month of 1922, and an increase of 115 per cent over the same month of 1921. A large majority of these accidents involved motor vehicles.

The month's records for all three years, as compiled by the company's insurance department show the following:

Total number of accidents, June 1921, 19; number of persons killed, 6; number of persons injured, 20. June 1922, number of accidents, 23; persons killed, 14; persons injured 21. June 1923, number of accidents 32; persons killed, 19; persons injured 37.

Reports of casualties on the streets and highways indicate that the experience of the Pennsylvania railroad in this respect, closely corresponds to that of the country as a whole. If the record of accidents at crossings for June may be regarded as the trend of such accidents generally, the showing for the present summer will be by far the most deplorable yet recorded.

An examination of the accident reports show that defective automobile brakes, disregard of crossing watchmen's signals to stop, stalling on tracks, high speed and other forms of reckless driving are the primary causes of the increase in deaths and injuries at highway crossings.

Baltimore, Md.—For six sweltering weeks Miss Margaret Stitzler was kept buried beneath a mound of heavy blankets and fed four quarts of milk daily to safeguard her beauty. She was a victim of a fire being trapped on the seventh floor of the burning building. The treatment is said to have been successful.

Portland, Ore., July 21.—"The American college woman is in danger of being spoiled by the attentions showered upon her by the world."

"She can't walk down the street, go hiking, put on a new gown or dance without knowing she is being closely watched, talked about and discussed from every angle."

"It is indeed a test of her poise and character if she retains her wholesomeness and womanliness when she is so much a part of the writings and conversation of the day."

These are the observations of Dr. Aurelia H. Reinhardt, first vice president of the American Association of University Women and president of the Mills college of Oakland, Calif.

The day and age should be looked into carefully, rather than wasting so much time in wondering if the young

people are measuring up to commonly accepted standards Dr. Reinhardt advised.

"The past few years have been veritable living fires of emotion," she said. "Passions of mankind were stirred almost beyond belief. And the intense emotionalism of the war will show itself for a generation. It is reflected in manners, customs, dress, music, art—everything."

"Perhaps the modern girl is a little gay—a bit given to spooning and frivolities—in her atmosphere of jazz, she could hardly be otherwise, but the real worry will come if she ever loses her instinct to feel genuinely and truthfully."

"My candid opinion is that the American college girl is the salt of the earth. In the emergency or crisis she always triumphs with self-sacrifice and devotion to high ideals."

EXPLAIN CAUSES OF DOLLAR WHEAT

America, Europe And Asia Planted Heavily, Says College Experts.

Overproduction at home, and a return of nations overseas to wheat production on a large scale are main factors in the present wheat price, according to the judgment of rural economists at the Ohio State university, expressed in a special statement on dollar wheat sent out to county agricultural agents early this week.

America's present wheat acreage is 24 per cent greater than it was before the war, they state. Despite this increase, wheat prices have during the first four years after the armistice maintained a level above the average price of farm products, they add, and this they attribute to the factors:

"First, American wheat yields of the past five years have been only 13.4 bushels to the acre, 12 per cent below normal. Second, for the first few years after the war Russia and others of the great grain exporting countries virtually turned the job over to America. Our normal pre-war wheat export was 100 million bushels our 1922 export was 225 million bushels.

"Wheat was thus held above the average of farm products prices until June, 1922," continue R. P. Taber, who lively below this level when it became apparent that Europe and Asia thereafter would produce more of their own wheat. Russia's probable export this year is set at 15,000,000 bushels. India expects to export between 60 and 100 million bushels, as compared to 9,000,000 bushels last year."

Miss Cobbs To Wed

At a beautifully appointed party Friday evening at her home in Damascus, announcement was made of the engagement of Miss Anna Cobbs, daughter of L. and Mrs. A. R. Cobbs, to Stewart Hise of Alliance.

This interesting bit of news was conveyed to the guests when Miss Carrie Walker was called to the door and given a "telegram," which proved to be the announcement of Miss Cobbs' engagement. The wedding will be an event of August.

The home was profusely decorated in a motif of green and white, with white sweet peas and white roses the favored flowers. The lunch appointments were in keeping with the predominating colors. The favors were little "bride" dolls gowned in white silk crepe with bouquets of white sweet peas.

The girls who served were Mary Cobbs, Mabel Walker, Lucille Bennett, Edna Prim and Naomi Carl.

Games contributed pleasure and for one of these instrumental music was given by Mary Cobbs and Edna Prim.

Pleasing piano selections were offered by Miss George, Alliance, and a vocal solo by the bride-elect was appreciated.

Both Miss Cobbs and Mr. Hise were graduated from Mt. Union college. Miss Cobb has been a teacher in the Rogers High school. She has a wide circle of friends.

Some of the 35 guests came from Salem, Beloit and Alliance.

Build Club House At Sevakene Lake

Sebring, July 21.—Sevakene Lake club house, the property of the Sevakene Lake association, is nearing completion. The club house is located on beautiful Sevakene lake near Sebring.

The building is a two-story structure, and will contain strictly modern club parlors, a dining hall and a dance floor. The floor will be of the three-layer type, of maple and will be 40 feet wide and 50 feet long. A veranda will run around the house on three sides.

Located in a shady grove on the shore of the lake, the club house is charmingly situated. The dance floor will be on the second floor of the building, while the dining hall and club parlors will be on the ground floor. It is probable the first social function will be held at the club within the next two weeks.

Crabbe Refuses Pay To Special Counsel

Columbus, July 21.—Director of Welfare Harper declared today that a letter from Atty. Gen. Crabbe, which stated his department would refuse to pay for services of a special attorney to represent the state in the Standard reinsurance hearing before the state civil service commission dated June 29, did not get to his office until July 2.

Notice of the refusal to pay was received after Atty. R. W. Walton was employed by Harper, the latter said. Walton has presented a bill for \$1,500, payment of which Crabbe refuses to authorize. Harper criticized such action.

SEASONABLE DISHES

Take a small-sized ripe red tomato, remove a snipe and peel, leaving some of the peeling at the base. Now cut with four slashes way to the base, leaving a tulip-shaped tomato. Fill with chopped celery, nuts or cucumber with a good salad dressing well-mixed into it. Garnish the top of the flower with a bit of a walnut. Serve with graham bread and tuff info oblongs, on which are placed the same shaped pieces of cheese.

Cinnamon Toast.—This is very popular as a tea accompaniment and may be prepared by the electric toaster at the table. Spread thin slices of the toast with butter and cover with a mixture of cinnamon and powdered sugar. Allow the toast to stand until it becomes saturated with the melting mixture.

The most delicious iced tea is prepared from freshly-brewed hot tea. Pour the tea over a large piece of ice and serve poured over cracked ice in tall glasses. Serve with preserved pineapple, sliced lemon or clear with sugar.

The tea wagon is a valuable piece of furniture for the porch tea or meal. For the housekeeper without a maid it is a great step saver as well as, when nicely laid, an ornament to the occasion. The design with folding leaves will carry the entire service. The lower shelf can be used for plates, glasses and extra dishes.

Best Lima Beans.—Take two cups of fresh lima beans, add one medium-sized onion, pepper, onion and carrot, chopped. Cook in boiling water until tender. Drain, then add, reserving when draining one-half cupful of the liquor. Melt two tablespoonfuls of butter, add two tablespoonfuls of flour, pepper and salt to taste, then add one-half cupful of the liquor and the same amount of milk; cook until smooth, pour over the vegetables and serve hot. Any liquor not used may be reserved for soup for another meal.

Brown bread toasted and spread thinly with jelly or jam makes tasty open sandwiches to serve with tea.

A Sad Miscalculation

By JOHN PALMER

ELISE uttered a little cry as the current began to carry her whirling toward the rapids. She struggled vainly to turn it toward the shore.

Then a little young fellow had leaped into the skiff that was hidden among the overhanging alders, and with vigorous strokes was making his way toward her. In a few moments he had grasped the edge of the canoe and he had drawn Elsie to the bank, where she promptly fainted, or, at least, did her best to.

That was the beginning of the summer's romance. Elsie was staying with a girl friend from the office at the little North Woods hotel. May was all interest when she learned that the two met every day.

"He's such a good-looking young man," she said. "Oh, Elsie, I should like nothing better than to marry a man like that and share his cabin in the woods, even if he is half-Indian."

"Nonsense, May," answered Elsie. "He's only an eighth Indian; anyway, he told me so. But that's not the point. Who's going to give up New York to share a squatter's cabin and have a brood of grassy kids running about one? Br! Elsie shivered.

"But, Elsie, I thought you said you loved him."

"Oh, love," said Elsie. "It's just a summer flirtation, that's all."

May sighed, for she was romantic. She hated to think of Elsie making a fool of the young fellow, who was evidently desperately in love with her. He called every day with little offerings—a pair of partridges, or some trout; and once he brought a basket woven of sweet-smelling grasses, Indian fashion.

Two miles down the lake was the club house. He was acting as guide, they discovered, to the millionaire, Ephraim Rogers, who came there every year to fish. Ephraim was a widower of fifty, and well-preserved.

"Oh, May, if only I could scrape acquaintance with Mr. Rogers!" said Elsie.

"Oh, Elsie, how can you be so heartless!" May answered.

And yet the apparently impossible did eventuate, for one day the girls came face to face with Ephraim Rogers on the trail, accompanied by his guide, and he stopped and spoke to them. He ended by inviting them to the camp for dinner.

May noticed how Elsie seemed to forget all about poor Jean that evening, laying herself out to captivate the millionaire. Jean sat by, disconsolate.

And Ephraim responded so evidently to Elsie's approaches that it was easy to see the girl's dream had reasonable prospects of coming true. After that Ephraim and Elsie were constantly together, and Jean seemed forgotten.

"May, I do believe he's going to propose to me," said Elsie jubilantly one evening. "He has been telling me all about his home and his family, and if that isn't a sign, what is?"

"Has he any children?"

"One son, just out of college."

May said nothing, but she noticed that Jean never appeared with any little offerings now.

And then, two or three evenings before the date fixed for the girls' departure, May witnessed a painful scene between Elsie and Jean.

She had been walking along the trail, and stopped, hearing their voices. "Then you never cared?" Jean asked.

"My dear boy, of course I cared in a way. But one has to be practical. I am not going to give up New York in order to share a cabin with you in these woods."

"If I go to New York and fit myself for you," pleaded Jean.

"Oh, forget it. It can't be done," Elsie answered. "And how long do you think I'm going to wait, anyway?"

Jean hunched his shoulders and turned away. May went home softly and never told Elsie she had heard.

It was two days later that Ephraim waved to them cheerfully from the shore, where he sat fishing.

"We're leaving for New York tomorrow, girls!" he called. "Guess we'll meet again some day."

A cold chill crept to Elsie's heart. "I don't know what we'd have done without your company, young ladies," Ephraim continued. "I guess my boy and I pretty nearly lost our hearts to you."

"Your boy?" gasped Elsie.

"My son, John. Here he comes! What, can't you stay? Maybe we'll see you again before you go, then."

Tea Kills Germs.

Tea is commended by Maj. J. G. McNaught, an army surgeon who declares that the typhoid germ, in pure culture, becomes greatly diminished in numbers by an exposure of four hours to tea. After twenty hours it was impossible to recover it at all from the cold tea. He recommends the use of cold tea as a substitute for water in soldiers' canteens during active service. Major McNaught suggested some time since that everybody should drink tea. If prepared in the proper manner, tea, according to physicians constitutes a refreshing and not harmful beverage; for it is the tannin and other extracts which are drawn out only after continued steeping, that are productive of harmful consequences. "Bulld" tea gives a coppery coat to the stomach and a saffron hue to the face.

STREET CLEANING FUNDS ARE SHORT

Assessment May Be Raised By Council To Overcome Deficit.

Columbiana, July 21.—Three hundred dollars is the amount directly assessed property holders of Main st. to provide for keeping the streets clean. Beginning with the William Schlar property, North Main st., extending to the Pennsylvania railroad, five cents per foot is assessed and paid in by these property holders with the December tax.

It has long since been found that this is an insufficient amount for the purpose. The deficit has been provided for by the general fund for street improvement. At the last meeting of the city council the matter was discussed and it was generally agreed that in making the new assessment 10 cents or more must be levied on the owners of business properties on Main st.

MIGHTIEST FORCE IS LOVE

No Other Human Emotion So Strengthens the Character and Makes for Aims That Are Noble.

"We are shaped and fashioned by what we love."—Goethe.

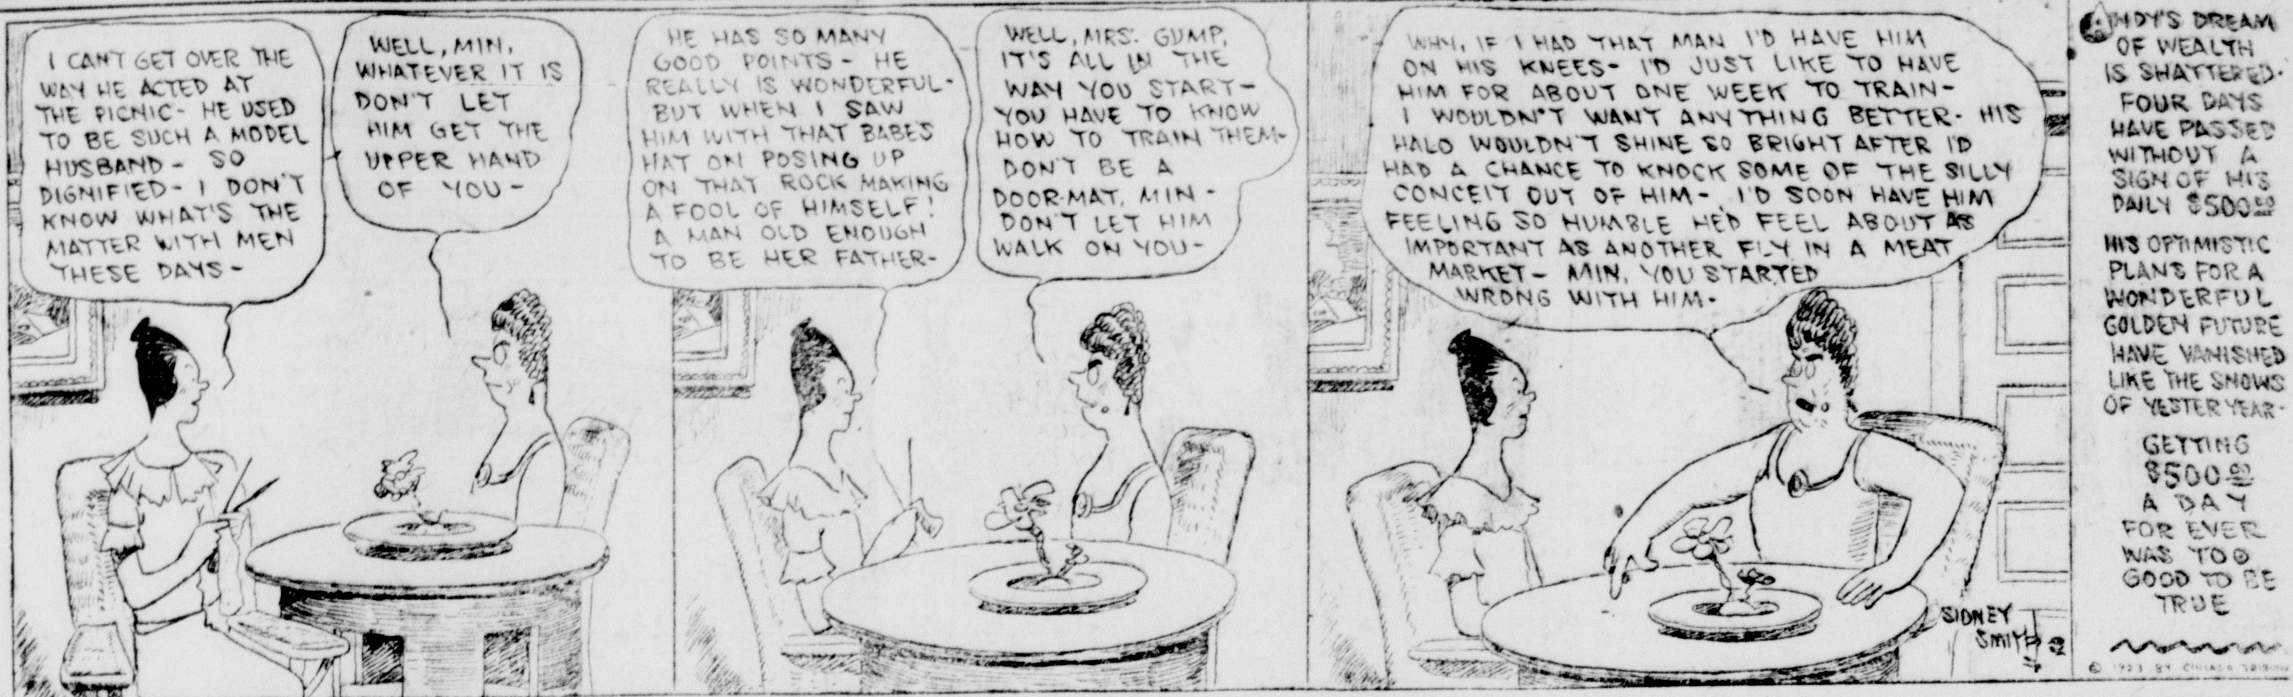

"Love is the great purifier of the soul. It strengthens the character and gives a higher motive and a nobler aim to every action of life. It gives both to men and woman those higher attributes of the soul—courage, faith, nobility, strength, tenderness. It guides the life toward nobler, stronger manhood or sweeter, truer womanhood. It is the noblest gift with which a human being can be endowed. He who holds the love of another holds Heaven within his grasp. And he whose heart gives love to another enriches not only his own soul, but likewise enriches the soul of every man, woman and child whose life he touches. Love is the most potent thing in the world!"

Love—true love—is indestructible. Indifference, abuse, ingratitude, repulsion cannot destroy true love; through all this true love loves on. Love simply loves, asking nothing in return. It purifies, ennobles and refines character with the touch of a Midas; it is always constructive, never destructive. Genuine love is a force that is ever uplifting. Even when sown in a barren soil it is not wasted; it always chastes, beautifies and enriches the life of the one who loves.

"If there be one thing pure, where all beside is sullied, and that can endure when all else passes away—if aught surpassing human deed, or word, or thought, it is a mother's love."—Spandara.

BACK ACCHED TERRIBLY

Mrs. Robinson Tells How She Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Amarillo, Texas.—"My back was my greatest trouble. It would ache so that it would almost kill me and I would have cramps. I suffered in this way about three years; then a lady friend suggested that I try Lydia E. Pinkham's Vegetable Compound. I have had better health since, keep house and am able to do my work. I recommend the Vegetable Compound to my friends as it has certainly given me great relief."—Mrs. C. B. Robinson, 608 N. Lincoln St., Amarillo, Tex.

The Vegetable Compound is a splendid medicine for women. It relieves the troubles which cause such symptoms as backache, painful times, irregularity, tired and worn-out feelings and nervousness. This is shown again and again by such letters as Mrs. Robinson writes as well as by one woman telling another. These women know what it did for them. It is surely worth your trial.

Where Does The Foot End And Leg Begin?

Ganton, July 21.—Where does the foot end and the leg begin? Common pleas court here is asked to decide the question.

Charles Kraschensky was awarded compensation by the state industrial

commission for the loss of a foot in a mine accident.

The amputation was made nine inches below the knee.

The miner claims he lost a leg. The industrial commission thought he lost a foot.

So the court will decide.

Los Angeles' residential district got a real thrill one night recently when about a 150 white-robed horsemen galloped wildly through the main thoroughfares, whooping and yelling as though nothing short of three or four hangings could satisfy their appetite for excitement.
Those who crawled from under cover in time to make inquiries learned that the "manhunt" was staged by John M. Stahl as one of the thrills for his first National attraction, "One Clear Call," being shown at the State

Hints to Amateurs Who Wind Their Own

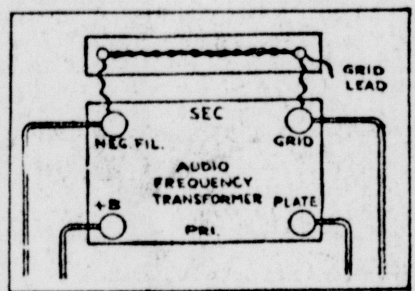

Here is a hint for those amateurs who "wind their own" coils for variocouplers, variometers, etc., on cardboard tubes. We have all been warned time and again regarding the ill effects following the shellacking of such coils to keep the wire in place after it is wound, the said ill effects being capacity or a condenser-like action between the wire and the shellacked covering, which causes a certain degree of choking of the signals.

This difficulty was overcome in the following way: The cardboard tubes are thoroughly dried in a warm oven and then given a coat of shellac both inside and out. As soon as this has dried the outside is given another coat. This should leave the surface quite glossy.

The wire is then wound in the usual manner, the ends being secured through holes in the edges of the tube. The wire is then "painted" with wood alcohol, which the covering absorbs greedily; then the coil is set away to let the alcohol evaporate. Keep it away from fire. The alcohol softens the shellac and this in turn sticks to the cotton covering of the wire where it is in contact with the tube. It will be found that the wire is held securely enough for couplers and variometers also the rotors of these, but not for tuning coils with which a slider is used.

Grid Leak Takes the "Fry" Out of the Set

The amateur who has a one or two-stage audio frequency amplifier on his set is well acquainted with the hiss or frying sound it gives forth when operating at its best or highest capacity. By placing a grid leak across the secondary of the last amplifying transformer nearly all the frying and hissing noise can be eliminated without noticeably reducing the signal strength.

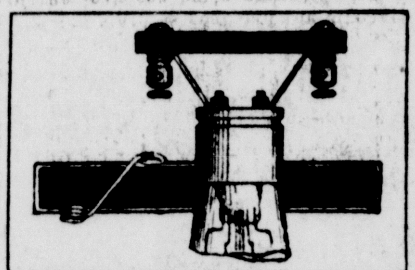

When static is real bad the strength of the leak can be increased to where it will take the harshness out of the static, but it will reduce the signal somewhat.

The ordinary grid leak consisting of pencil marks on a strip of paper can be used, but best results are secured by making these lines with ordinary black drawing ink.

To Make a Mounting for "W. P. 11" Tube

It is in some places impossible to purchase a socket for the "W. P. 11" tube (generally called the "peanut" tube) at any price.

With a piece of bakelite three inches square, four binding posts and some spring brass wire one can be made. The spiral part of the wire is

bent around a six-penny wire finishing nail firmly held in a vise for the three small contacts, and the one for the "grid" contact (which is larger on this tube) is bent around a twenty-penny spike.

The inside of the coils is brightened with a rat-tail file to insure contact.

This socket works perfectly, and the natural springiness of the wire takes up any sudden jar.

SHORT CIRCUITS

The successful radio amateur is generally a man of parts.

An eastern radio club wants a suitable design for a club pin. How would a crystal set in platinum do?

Doctor De Forest says that radio has fired the imagination of youth. We know some youths whose imaginations might well be fired.

When your ice bill comes in, don't grumble. Think of the fellow who has to provide for the wide range of the radio broadcast.

If the loudspeaker on your radio is unsatisfactory, how would you like to have a desk next to a fellow who yells all day over the telephone?

A loading coil is an inductance connected in the antenna circuit to receive longer wave lengths than the natural wave length of the antenna.

A man buys a radio set, not so much to hear a great orchestra, but to tune that orchestra in and out and thereby show the musicians that they have nothing on him when it comes to bringing out harmony.

A prominent government official writes that the poor quality of music furnished by the smaller radio stations is handicap to radio development in the smaller towns. He believes that by redistributing the output of the high-grade stations much better progress will be made.

Persons who want anything know that The News is the Want Medium in this vicinity. So read it.
